PROFESSIONAL SUMMARY

BSIT graduate (May 2026) specializing in Network & Security with hands-on full-stack development experience. Configured enterprise MikroTik RouterOS for a public K-12 school serving 300+ users; deployed production web applications with real user bases. Civil Service Eligible (Professional Level). Targeting IT Support, Network Engineering, NOC Operations, or Junior Full-Stack Development roles.

EDUCATION

Cagayan State University – Carig Campus Aug 2022 – May 2026
Bachelor of Science in Information Technology, Major in Network & Security

EXPERIENCE

IT Intern (On-the-Job Training) Dec 2025 – Apr 2026
Department of Information and Communications Technology (DICT) – Region II | Tuguegarao City, Cagayan

- Configured MikroTik RouterOS via Winbox - applied IP addressing, DHCP, NAT (srcnat/masquerade), and wireless SSID setup under staff supervision.
- Tested and validated firewall rules, mangle rules, and packet marking to enforce traffic control and network security policies.
- Tuned WAN bandwidth using Simple Queues, Queue Tree, and PCQ - eliminating congestion and improving throughput fairness across all user groups.
- Assisted in Starlink WiFi and Litebeam P2P setup demonstrations alongside senior technical staff; deployed and supported workstations for 10+ official seminars with Tier-1 IT support.

PROJECTS

Portfolio Profile (Interactive Systems Portfolio) 2026
React.js • Vite • Tailwind CSS • Framer Motion • Vercel

- Built a production-grade SPA with modular component architecture - decoupling UI from global state; optimized mobile scroll to consistent 60 FPS by disabling GPU-intensive backdrop-filters on touch devices.
- Implemented gesture-driven Framer Motion animations including a reading progress tracker, responsive section navigation, and a hidden Konami-code easter egg.

AgriBuddy (Smart Farming Assistant — Mobile & Web Ecosystem) 2026
Flutter • Dart • Riverpod • Firebase • React.js • Node.js • MongoDB

- Delivered a dual-platform ecosystem - a cross-platform Flutter mobile app and a React dashboard - enabling farmers to track crops, expenses, and harvests in one unified system.
- Integrated localized AI personas via Groq (Llama 3.3) and Gemini; architected a hybrid backend with Firebase real-time sync and a JWT-authenticated Node/Express REST API with MongoDB.

Live Preview: [AgriBuddy](#) Mobile App: [AgriBuddy-Mobile](#)

Centralized Network Management System (Capstone Project) 2025 – 2026
MikroTik RouterOS • User Manager • VLAN • Captive Portal • Firewall

- Co-designed and deployed a managed MikroTik RouterOS network for a public K-12 school - replacing an unmanaged setup and supporting 300+ concurrent users campus-wide.
- Implemented captive portal authentication (User Manager + session caps), 3-strike brute-force lockout, and VLAN segmentation for CCTV traffic isolation; authored a regional low-cost deployment blueprint.

TECHNICAL SKILLS

Routing & Switching: MikroTik RouterOS/Winbox, DHCP, NAT, Static Routing, VLAN, IP Subnetting, Cisco Packet Tracer

Network Security: Stateful Firewall Rules, Mangle/Packet Marking, Captive Portal, Brute-Force Lockout, ACLs

Bandwidth & QoS: Simple Queues, Queue Tree, PCQ, Traffic Shaping, QoS Policy

Wireless & Infrastructure: Hotspot Portal, Starlink WiFi, Litebeam P2P, SSID Configuration, Workstation Deployment

Full-Stack Development: React.js, Node.js, MongoDB, REST API, JWT Auth, RBAC, Tailwind CSS, Vercel, Render

Systems & Tools: Git, Postman, Windows Administration, VMware, VirtualBox, Hardware Servicing

CERTIFICATIONS & ELIGIBILITY

- Civil Service Eligibility – Professional Level | Passed | 2024
- Google IT Support Professional Certificate | Coursera | 2024
- Artificial Intelligence & Prompt Engineering in Digital Literacy | DICT Region II | 2025
